Farouk Messai

SOFTWARE DEVELOPER | MOBILE & WEB DEVELOPMENT

Open to PFE Internships & Junior Software Development Opportunities

Location: Tunisia (Available for Remote Worldwide) Email: faroukmessai221@gmail.com

GitHub: github.com/Farouk-MY LinkedIn: linkedin.com/in/faroukmessai

PROFESSIONAL PROFILE

Software developer focused on building robust web ecosystems and cross-platform mobile applications. Committed to clean code, component-driven architecture, reactive state management, and thoughtful user experiences. Passionate about modern TypeScript engineering, Flutter mobile development, and real-time backend integrations.

CORE ENGINEERING COMPETENCIES

`Flutter` `Dart` `React Native (Expo)` `Next.js (App Router)` `React 19` `TypeScript` `FastAPI (Python)` `Node.js / Express` `PostgreSQL / pgvector` `Supabase` `Three.js / WebGL` `Riverpod / Zustand` `WebRTC` `Git / CI/CD`

FEATURED SOFTWARE PROJECTS

MediConnect

Mobile & Cloud Architecture

Cross-Platform Telemedicine & Clinical Coordination System

Comprehensive healthcare coordination application facilitating practitioner scheduling, encrypted patient QR identification, and direct peer-to-peer WebRTC video consultations with FastAPI and Supabase PostgreSQL.

`React Native` `Expo` `FastAPI` `WebRTC` `Supabase`

Smart Class

Cross-Platform & AI Cloud

Intelligent Collaborative Virtual Learning & Real-time Lecture Ecosystem

Virtual classroom ecosystem combining multi-surface Flutter client applications with local AI course generation, intelligent lecture video navigation, and vector search with PostgreSQL pgvector.

`Flutter` `Riverpod` `Node.js` `pgvector` `PostgreSQL 17`

NEXFORM

3D Web Platform

Interactive 3D Setup Studio & Product Customization Platform

In-browser 3D furniture customization application with PBR materials, Draco mesh decompression, parametric room sizing, and responsive Next.js App Router integration.

`Next.js` `Three.js` `React Three Fiber` `TypeScript` `Zustand`

LinguaMate

Cross-Platform Mobile

Multilingual AI Companion & Interactive Language Learning App

Mobile companion app combining real-time speech dialogue, interactive pronunciation scoring, offline SQLite caching, and spaced-repetition vocabulary retention algorithms.

`Flutter` `Dart` `Speech Recognition` `Supabase` `Clean Architecture`
